

MSI Package (Deployment) - Manual

Installation and Configuration

Karlsruhe, September 2026

© Bee360

Preface

When to use the Bee360 MSI package?

The Bee360 MSI package is designed for a comfortable and easy rollout of the Bee360 App within a controlled deployment process.

Objective

This document describes how to prepare, install, configure and uninstall the Bee360 App in a controlled deployment process by the help of the Bee360 MSI package.

Content

- High Level Package Properties
- Requirements and Pre-Installation
- Package Details and Installation
- Post-Installation
- How to update or uninstall the Bee360 App?

Questions

In case of further questions please contact the Bee360 support team:
support@bee360.com

Installation Requirements - Overview

The installation and deinstallation described in this manual requires that

- the target machine runs with a 64bit Windows OS.
- there is either no other Bee360 App installed at the target machine,
- or any installed Bee360 App has been received via the central software distribution of your company (based on the standard MSI package for deployment provided by Bee360).
- the following runtimes are installed:
  - *Microsoft Visual C++ 2019 Redistributable*
  - *WebView2 (x64)*
- the following certificate is installed (only required, if the Bee360 instance is hosted at Bee360 company):
  - *SSL.com TLS RSA Root CA 2022*

Installation Requirements - Details

Microsoft Visual C++ Redistributable Packages

Official download for *Microsoft Visual C++ 2019 Redistributable:*

- https://support.microsoft.com/de-de/help/2977003/the-latest-supported-visual-c-downloads

WebView2 Runtime (x64)

For details on distributing this runtime see

- https://docs.microsoft.com/en-us/microsoft-edge/webview2/concepts/distribution

Certificate

This certificate is needed if the Bee360 instance is hosted at Bee360 (for instances hosted on prem, the certificate is not necessary). If the target machine was already connected to a Bee4IT or Bee360 instance (hosted at Clausmark/Bee360) in the past, the necessary certificate may be already installed.

Official download for *SSL.com TLS RSA Root CA 2022*:

- https://www.ssl.com/article/ssl-com-root-certificates/
- Install to Certificate Store “Trusted Root Certification Authorities”

Package Details and Installation

The MSI package copies the following files to %ProgramFiles%\Bee360\Bee360\

- *Bee360.exe* — executed when the user starts the Bee360 App.
- *Bee360Launcher.exe* — executed when the user opens a BeeLink.
- all necessary *.dll-files*

The MSI package writes **registry entries** to

- [HKEY_LOCAL_MACHINE\SOFTWARE\Bee360]
- [HKEY_LOCAL_MACHINE\SOFTWARE\Classes\bee]

The MSI package creates the **start menu entry** *Bee360* in the folder *Bee360.*

Installation

- Add the MSI package to the pipeline of your standard software deployment system. The MSI package brings all that is needed for the installation. There are no Bee360-specific configurations necessary.
- Please make sure, the installation does not proceed if an existing Bee360 App is still open.
- The installation will take less than a minute.

© Bee360

Post-Installation

There are no special configurations necessary.

How can the user connect to the Bee360 instance?

With the Bee360 App, users can connect to different Bee360 instances (like productive, education, test, and development instances). The necessary configuration of such a connection is as easy as entering an URL at a browser and is done by each user individually.

There are no further configurations necessary during deployment.

How to update or uninstall the Bee360 App?

Update/Upgrade

Assuming that the already installed Bee360 App version is based on a standard MSI package provided by Bee360 (see also the requirements),

- increasing the app version is done according to the MSI Update/Upgrade process based on the concept of Product ID and Upgrade Code. There are no special configurations necessary.
- The information needed by the Update/Upgrade process is stored in the MSI.

Deinstallation

Assuming that the installation of the Bee360 App is based on a standard MSI package provided by Bee360,

- uninstalling is done according to the MSI Uninstall process. There are no special configurations necessary.
- The information needed by the Uninstall process is stored in the MSI.
- All resources (files, registry entries etc.) registered in the MSI will be removed.
