Bee360 App Installation - User Manual for In-App Download

Download

1. Open the **Bee360 web application** in your browser and log in with your user account.
2. Click the **question mark icon (Help Center)** in the top right corner, next to the notification bell. It is always visible, whatever dashboard you are on.
3. In the menu that opens, select **Get the Bee360 App** (see screenshot below).
4. A pop-up window opens. Click **Download**. The download starts automatically. When it finishes, you will find a file named **bee360_oneclick_installer_<version>_x64.msi** in your default download folder.
5. Make sure the file has been fully downloaded before proceeding to the installation.

Installation Steps

1. Locate the downloaded **MSI file** on your device (usually in the *Downloads* folder).
2. Double-click the **MSI file** file to start the installation.
3. The installation will automatically run in the **user context**.
4. Follow the on-screen instructions. No path selection or additional configuration is required.
5. Once the installation is completed, the Bee360 App will automatically create an entry in your **Windows Start Menu**.

You can now launch the application directly from the Start Menu.

Note:

- If you do not have permission to execute an MSI file, please contact your **help desk**.
- When you start the app for the first time, you may receive a message like: 'You'll need a new app to open this qrc link'. Simply **click outside** the message window to continue.

Configuration

1. Launch the Bee360 App from the **Windows Start Menu**.
2. When the application starts for the first time, you will see the following message on the screen (see screenshot below): *“There are no instances configured. Please add a new instance.”*
3. Click the **plus (+) button** on the right side of the screen to add a new instance.
4. A dialog window will appear. Enter your organization’s **Bee360 instance URL**.
   - You can see your instance URL in the **address bar of your browser** when you are logged into the Bee360 web application.
5. Confirm your entry. The instance will be saved and is available for login.

Verification

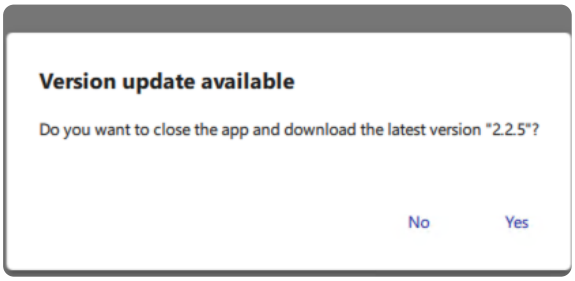

1. After you have entered and saved your instance URL, it will appear in the **instance selection drop-down menu** (see screenshot below).
   - If you have only one instance, it will be **preselected automatically**.
2. Click on the **Login** button.
3. Enter your credentials if prompted.
4. If the installation and configuration were successful, you will be redirected to your **Bee360 Home Dashboard**.
   - The dashboard **should look exactly the same as in the Bee360 web application**.

Update

To update the Bee360 App:

1. If a new version of the Bee360 App is available, you will be asked to download the new version when you start the Bee360 App.

2. Click **Yes** to download the latest version.
3. Make sure the file has been fully downloaded before proceeding to the update.
4. Locate the downloaded **MSI file** (bee360_oneclick_installer_latest_x64.msi) on your device (usually in the *Downloads* folder).
5. Double-click the **MSI file** to start the update.
6. The installer will detect the existing app and replace it with the new version.
7. Follow the on-screen instructions to complete the update.
8. Launch the app from the **Windows Start Menu** to verify that the update was successful.

Uninstallation

To uninstall the Bee360 App:

1. Open the Windows **Start Menu** and go to:
   - **Settings > Apps > Installed Apps** (Windows 10/11).
2. In the list of installed applications, locate **Bee360**.
3. Select the application and click **Uninstall**.
4. Follow the on-screen prompts to complete the removal.
5. After the uninstallation, **restart your device** to ensure all components are removed.

Note:

- If you do not have permission to uninstall applications, contact your **help desk** or **system administrator**.
- If the administrator also cannot remove the Bee360 App via the standard Windows procedure, ask them to explicitly remove the following:

File system:

```
C:\Users\<user name>\AppData\Local\Bee360
C:\Users\<user name>\AppData\Roaming\Microsoft\Windows\Start
Menu\Programs\Bee360
```

Registry:

```
[-HKEY_CURRENT_USER\SOFTWARE\Bee360]
[-HKEY_CURRENT_USER\SOFTWARE\Classes\bee]
[-
HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Windows\CurrentVersion\Uninstall\
{<Product ID of Bee360 App>}]
```
